## TECHNICAL SKILLS

---

Languages: TypeScript, JavaScript, Python, SQL

Backend: Node.js (Express), FastAPI, WebSockets, Docker

Frontend: React.js, Next.js, Tailwind CSS

Database and tools: PostgreSQL, MongoDB, Redis, Git, GitHub, Postman, Figma.

## EXPERIENCE

---

Web developer Intern | *Gratia Technology Pvt. Ltd, Guwahati*

Nov 2024 – Jan 2025

- Built and delivered a Task Management Dashboard using React.js as a primary internship deliverable.
- Implemented core functionality including task creation, status updates, and deletion, ensuring smooth state management across the application.
- Designed a responsive UI to visualize workflow progress, demonstrating clean component architecture and prop drilling logic.

AI Research Intern | *National Institute of Technology (NIT) Agartala*

Jun 2025 – Jul 2025

- Collaborated with a 9-member research team to develop "Fast-Track," an automated attendance system using Python and OpenCV.
- Contributed to the face detection module, writing scripts to capture real-time video feeds and match user data against a local database.
- Assisted in integrating the software logic with Arduino hardware to provide physical feedback (LED indicators) upon successful attendance logging.

## PROJECTS

---

PawSense | *Next.js, FastAPI, Docker, Python, TypeScript*

[GitHub](#)

- Engineered a hybrid web architecture using Next.js for the frontend and FastAPI for high-performance model inference.
- Dockerized the application to ensure consistent deployment across Python and Node.js environments

Backkit | *TypeScript, Node.js, Stream, CLI*

[GitHub](#)

- Built a CLI backup tool using Node.js streams to handle large file compression without overwhelming system memory (RAM).
- Implemented incremental file tracking, ensuring only modified files are processed to optimize storage and speed.

Slate | *React.js, NodeJS, TypeScript, WebSocket*

[GitHub](#)

- Developed a real-time collaborative coding platform (Google Docs for code) using WebSockets (Socket.io).
- Implemented bi-directional communication to sync keystrokes instantly between multiple users.
- Solved concurrency challenges to ensure state consistency during simultaneous edits.

Recipe Manager | *React.js, MongoDB, Express, JWT*

[GitHub](#)

- Built a full-stack content management system for recipes with a RESTful API backend.
- Secured user data using JWT authentication and password hashing (Bcrypt).
- Designed a MongoDB schema to handle relationships between users and their saved collections.

## EDUCATION

---

AssamKazirangaUniversity | Jorhat, Assam, India

2022 -2026

Bachelor of Computer Science and Engineering | CGPA: 7.69

Relevant Courses | Certificates

[FullStack Development Course](#) | 100xDevs

[Expert Lab National Hackathon](#) 2025 | IBM
